

Nutrisound® Dry Concentrate

Nutrisound® Dry Concentrate is a registered product of Agrarian Marketing Corporation, DBA Agrarian Solutions.
Updated: August 2017

A NEW APPROACH TO MANAGING FEED CHALLENGES

Currently additives focused around feed quality challenges can be grouped into two categories: binders and probiotic solutions. Clays and manno-oligosaccharides are the binders available on the market. Clays are the oldest of all treatments. Their effectiveness is limited both by the amount and number of different compounds they bind. Some products may bind important minerals and generally have a high inclusion rate in the diet. Ultimately the damage is still happening and will take its toll on health, production, reproductive and immune system failure. Increasing the nutritional plane is a solution that will only mask the real problem and can be quite expensive.

Nutrisound® Dry Concentrate is a unique direct-fed microbial product that is more effective than other DFMs because of the presence of L-form bacteria. Nutrisound® Dry Concentrate is designed specifically for feed challenges caused by molds and their metabolites. Nutrisound® Dry Concentrate should be fed when: feed ingredients are in poor condition; when symptoms are present and when feed assays show problems. Common signs of these problems are: loose manure, low or erratic feed consumption, and poor reproductive performance. Nutrisound® Dry Concentrate enhances the immune system to assist the animal when faced with these challenges.

RESEARCH Purdue University, University of Wisconsin, Chulalongkorn University

USE DIRECTIONS Mix Nutrisound® Dry Concentrate into livestock feeds at a rate of 1 (kg) per ton of complete feed.

PACKAGING 25 kg. bag (#9606)

STABILITY Stable for two years. Store in cool, dry place.

INGREDIENTS Montmorillonite clay, Calcium carbonate, Silicon dioxide, Dried *Bacillus Subtilis* fermentation product, Malic Acid, Glucose, Fructose, Tartaric Acid, Citric Acid, Benzoic Acid, Thiamine Hydrochloride.

GUARANTEED ANALYSIS
(per 1/2 ounce dose)

Calcium (Min)	5.0%
Calcium (Max)	6.0%
Tartaric acid (Min)	0.06%
Bacillus subtilis (Min)	25 x 10 ⁶ cfu/g
